

Muhammad Younis

Flutter Developer

Location: Multan, Punjab, Pakistan | Phone: +92-345-3454707 | Email: younis4707@gmail.com | [GitHub](#)

Summary

As a passionate Flutter Developer with a strong commitment to creating seamless and engaging mobile applications, I am eager to join your innovative team. My expertise in Dart and cross-platform development, combined with a collaborative spirit, positions me to contribute effectively to your projects. I am excited about the opportunity to leverage my skills to enhance user experiences and drive success for your organization. Let's build something amazing together!

Technical Skills

Programming Languages: Dart

Mobile Frameworks: Flutter (Android, iOS, Web)

State Management: Provider, Riverpod, GetX

Architecture Patterns: Clean Architecture, MVVM, MVC, Repository Pattern, Dependency Injection

Backend and APIs: Firebase, Supabase, REST API, JSON Serialization

Networking Libraries: Dio, Retrofit, HTTP

Databases: Firebase Firestore, Realtime Database, SQLite, Hive, SharedPreferences

Cloud and Notifications: Firebase Cloud Messaging (FCM), Push Notifications, Cloud Functions

Maps and Location: Google Maps SDK, Geolocator, Geocoding

Payments: Payment Gateway Integration

Tools: Git, GitHub, Android Studio, VS Code, Xcode

App Distribution: Google Play Console, App Store Connect

Work Experience

Flutter Developer | Maxcore Technologies | Multan, Pakistan

02/2024 – Present

- Develop and maintain cross-platform Flutter applications for Android and iOS
 - Integrate Firebase services including Firestore, Realtime Database, Authentication, and Cloud Functions to enable real time data synchronization and serverless backend logic.
 - Design and consume RESTful APIs using Dio and Retrofit, with structured error handling, request interceptors, and automatic token refresh logic.
 - Apply layered architecture (Data, Domain, Presentation) and MVVM pattern across projects, improving code maintainability and enabling full unit test coverage.
- Publish applications to Google Play Console and App Store Connect, managing release builds and code signing
-

Projects

Papyrus – Enterprise Document Approval Workflow

Technologies: Flutter, Firebase, Clean Architecture, Riverpod, Dartz, REST API

- Built a cross-platform enterprise document platform with digital template creation, multi-stage approval workflows, and role-based access control for enterprise users.
- Structured the codebase using layered architecture principles with Data, Domain, and Presentation layers, enabling full unit testability and modular development.
- Integrated PDF generation, rich-text editing, interactive dashboards, and in-app subscription billing connected to a payment gateway.
- Applied the Dartz functional programming library for robust error handling, reducing unhandled production exceptions by 50%.

DoorStep Partner – Field Service Management Platform

Technologies: Flutter, Google Maps SDK, Provider, Flutter Secure Storage, REST API, Dartz

- Built a full-lifecycle field service application covering job assignment, GPS-based monitoring, work verification, and earnings management for service providers.
- Created a secure digital wallet with encrypted local storage via Flutter Secure Storage, protecting personally identifiable and financial data.
- Developed partner onboarding, compliance training, and skills verification modules to validate professional qualifications before service deployment.

Me'kaaz – Smart Patient Care and Medication Management

Technologies: Flutter, Firebase, Google Maps, GetX, Local Notifications

- Developed a healthcare management platform for medication tracking, appointment scheduling, and patientcare giver collaboration across two countries.
- Configured automated medication reminder systems using local notifications and alarm services, measurably improving patient adherence rates.

CodRuk – Automotive Service Marketplace

Technologies: Flutter, Firebase Cloud Messaging, Architectural Best Practices, REST API, GPS, GetX

- Produced dual-role Flutter applications for customers and technicians, supporting vehicle maintenance booking technician dispatch, and live job tracking.
- Wired Firebase Cloud Messaging (FCM) for push notifications, achieving a 90% delivery rate for time-sensitive job alerts.
- Added GPS route navigation and service history management, reducing average technician travel time by 20%.

Education

Bachelor of Science in Information Technology

Ghazi University | Dera Ghazi Khan, Pakistan | Graduated: 11/2023

Languages

English: Professional Working Proficiency

Urdu: Native / Bilingual Proficiency
